It will take approximately 45 days to receive the sampling results.

Sincerely,

Cheryl Burdett

Dean – Thanks for the map and the explanation. I’m going to give a copy to Kurt on Monday at Senior Staff.

Cheryl – If you could give me the projected timing for lab results, I’ll let Kurt know about that too.

Thanks so much to you and others for the grueling week I’m sure you had out in the field to get the samples collected. I hope you all can relax over the weekend.

Linda

## Ex. 5 Deliberative Process (DP)

We took shallow and deep samples at each location (generally 45-49' and 30-34' below surface). So some of the points have two circles indicating different N concentrations and the two depths. If only one concentration circle is present at a sample location it means both shallow and deep samples had the same result.

Thanks,  
Dean
